Freilandschlupf von *Emys orbicularis* nach einer Überwinterung im Nest

A hatch of Emys orbicularis after overwintering in the nest

Abstract

In a cool and rainy region of Germany, the Rhineland, the author observed a just hatched *Emys orbicularis* in his yard in the late spring after an extraordinary long and wet winter. The turtle was obviously overwintering in the nest in that outdoor enclosure.

Key words

Emydidae: *Emys orbicularis*, hatching, outdoor enclosure, overwintering in the nest
